

1m2™

BY EESTAIRS

SPACE SAVING STAIRS

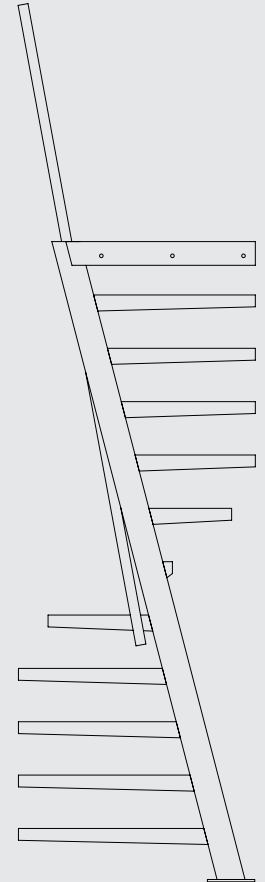

## 1M2'S BENEFITS

- 1 — Simple specification. 1m2™ stairs can be configured and costed online by anyone.
- 2 — Brilliant colours. The 1m2™ can be powdercoated in any RAL colour, plus special powdercoatings.
- 3 — Strong and safe. The system has been strength-tested and can support a load of 300 kilos.
- 4 — Rapid installation. Two professional builders can install 1m2™ stairs in about two hours.
- 5 — Satisfies regulations. 1m2™ stairs meet building regulations if used specifically in limited spaces.

## CUSTOMISATION

There are four main customisation options for the 1m2™ stairs, all of which can be specified with the easy to use online configurator:

- The rotation of the treads can be clockwise or anti-clockwise.
- The treads, column and handrail can be factory powder-coated in any one of the 200-plus RAL colours.
- The space-saving dimensions of the 1m2™ stairs allows them to be used in cramped spaces with floor-to-ceiling heights between 2.3m and 3.5m. EeStairs' in-house technical team can advise you about the possibilities.
- More additional options can be selected like riser bars or extended boarding steps.

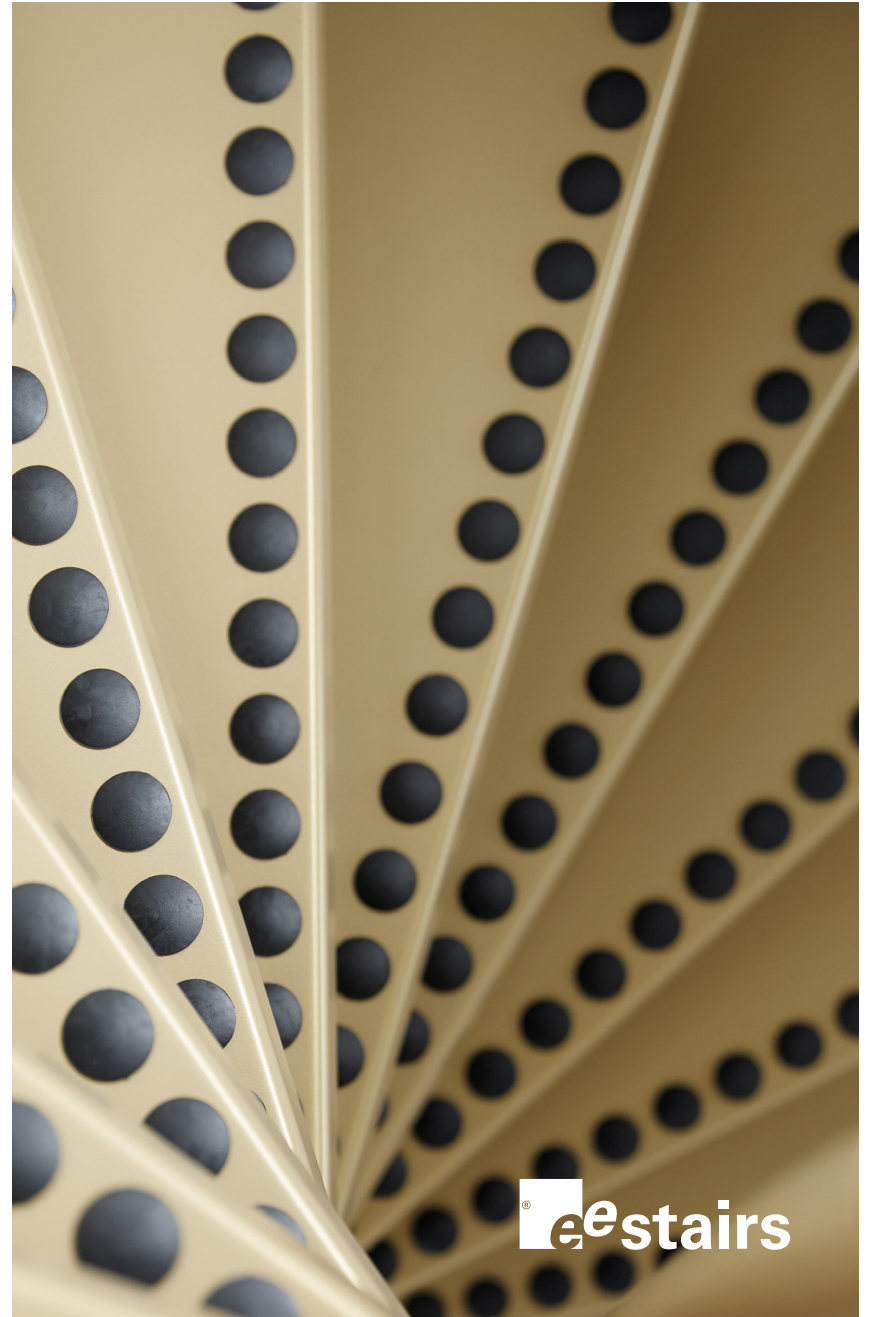

## CONFIGURE 1M2

Using the online 1m2™ configurator, the stairs can be specified rapidly in a five-step process. Once the configurator receives all information it immediately shows the cost and a 3D model of the staircase as specified.

## 1M2 BY EESTAIRS

The stylish and ultra-compact 1m2™ stairs are designed specifically for small homes and spaces by engineers and metal experts at EeStairs.

Remarkably, the 1m2™ stairs only need one square metre of space on floors and ceilings. And their crisp contemporary design and colour options make them a highly attractive focal-point even in the tightest spaces. Design quality is matched by strength and innovation. The 1m2™ staircase is precision-made in steel and features a unique column-and-handrail design in which the column is slightly slanted. And this is what makes the 1m2™ stairs so compact and secure.
